KNECK OFFICIAL

Geography — Paper 2

312/2 • ORIGINAL REVISION SET 01 • 2 hours 45 minutes • 100 marks

Name: _____ Class: _____ Date: _____

Independent KCSE-style practice. Not issued, endorsed or predicted by KNEC. These are original questions, not leaked or past official papers. Component numbering is checked against the KNEC 2026 timetable. A teacher should review these practice materials before formal classroom assessment.

CANDIDATE INSTRUCTIONS

Answer all of Section A. In Section B answer question 6 and ANY TWO questions 7–10. Use evidence, named examples and diagrams where appropriate.

Use a separate answer booklet. Show working where appropriate. The marking guidance begins after the END OF QUESTIONS page; do not consult it until you finish. Practical and project components require the stated equipment and teacher supervision, not merely a printed worksheet.

SECTION A

25 marks.

1. Define population density and state three limitations of using a national average. [5 marks]

2. Name two renewable sources of energy and explain one advantage of each in Kenya. [5 marks]

3. Distinguish subsistence from commercial agriculture and state one example of each. [5 marks]

4. State five factors influencing the location of an industry. [5 marks]

5. Give five sustainable tourism practices. [5 marks]

SECTION B

Question 6 and any two others; 25 marks each.

6. A settlement survey records households by water source: piped 120, borehole 80, river 50, rainwater 50. (a) Calculate total and percentage per category. (5) (b) Draw a pie chart. (6) (c) Explain three possible health or environmental implications without assuming every source is unsafe. (6) (d) Describe a suitable sampling method and two ethical precautions for follow-up research. (5) (e) Give three limitations of these data. (3) [25 marks]

7. (a) Explain five physical and human conditions favouring tea farming in Kenyan highlands. (10) (b) Describe processing from plucking to packaging. (7) (c) Explain four challenges and possible responses. (8) [25 marks]

8. (a) Explain five causes of urban growth. (10) (b) Discuss four problems of rapid urbanisation. (8) (c) Suggest seven practical planning responses. (7) [25 marks]

9. (a) Compare geothermal and hydroelectric power generation in Kenya. (10) (b) Explain four environmental/social impacts of energy projects. (8) (c) Give seven measures for responsible energy development. (7) [25 marks]

10. (a) Explain five factors that influence fishing in East Africa. (10) (b) Describe three fishing methods and state a sustainability concern for each. (9) (c) Give six fisheries management measures. (6) [25 marks]

END OF QUESTIONS

MARKING GUIDANCE

Geography • Paper 2 • Set 01

Suggested answers and assessment guidance, not an official marking scheme. Accept equivalent correct reasoning, valid examples and properly justified alternative methods. Marks for an item must not exceed its printed allocation. For essays use relevant textual evidence and the rubric; no plot summary alone.

SECTION A

1. (5 marks) People per unit area (2); conceals regional variation, ignores land suitability/age structure, depends on data accuracy/time; three (3).

2. (5 marks) Solar/wind/geothermal/hydro, two (2); two matched explained benefits (2); Kenya context e.g. Rift geothermal reliability (1).

3. (5 marks) Mainly household use versus mainly market/profit, paired explanation3 (3); suitable matched examples2 (2).

4. (5 marks) Raw materials,energy,labour,market,transport,water,capital,government policy; any five.

5. (5 marks) Waste control,habitat protection,visitor limits,local benefit,water saving,ethical wildlife viewing,low-impact transport; any five.

SECTION B

6. (25 marks) a Total300;40%,26.67%,16.67%,16.67% (5). b Angles144°,96°,60°,60°; accurate sectors/key/title (6). c Treatment/storage,river contamination risk,borehole sustainability/rain seasonality, three explained conditional points (6). d Random/stratified household sample described3, informed consent/privacy2 (5). e No water quality data,seasonal snapshot,household size/source reliability unrecorded, three (3).

7. (25 marks) a Reliable rainfall,mild temperatures,deep acidic well-drained soils,slopes,labour/transport/markets; five explained2 each (10). b Pluck young leaves,transport,withering,rolling/CTC,oxidation, drying,sorting/packing (7). c Price volatility/diversify markets; climate risk/adapt water and soil management; labour costs/fair efficient systems; transport/roads; pests/IPM, four matched pairs2 each (8).

8. (25 marks) a Rural-urban migration,natural increase,industrial/service jobs,administrative status,boundary expansion,transport/education, five explained (10). b Housing shortage,infrastructure pressure,waste/unemployment/congestion, four explained (8). c Affordable housing,public transport,water/sanitation,land-use planning,drainage,local jobs,green space,participation, seven (7).

9. (25 marks) a Geothermal underground heat/steam, Rift location,base-load but high exploration costs; hydro flowing water/turbines,river/dam dependence,rainfall variability/reservoir effects; five paired developed points (10). b Displacement,habitat change,water flow,emissions/noise/land access, four explained (8). c Impact assessments,consultation,fair compensation,ecological flows,monitoring,efficiency,rehabilitation,transparent benefits, seven (7).

10. (25 marks) a Water conditions,nutrients/species,capital,gear,transport/cold chain,markets,regulation five explained (10). b Gill net,line,trawl/purse seine etc: correct description2 and specific concern1 each (9). c Mesh limits,closed seasons,protected breeding areas,enforcement,pollution control,co-management,stock research, six (6).

REVISION CHECK

Mark your work, list three misconceptions, revise those topics and attempt the incorrect questions again without the guide. These topics are revision priorities, not a forecast of the real examination.
